MAGNOLIA GRANDIFLORA. 60-75 Ft. (Zone 6).

Southern Magnolia

Splendid tree. Despite reports to the contrary we can show you trees near our nursery over 75 feet tall which must be well over one hundred years old, surviving weather 29° below zero. Usually medium size evergreen tree with large, deep green, glossy leaves and immense lily-like, fragrant white flowers. Even though these older trees have withstood such sub-zero weather as mentioned above, would not recommend above zone 6, unless placed in a protected area in zone 5. Excellent plant, where adaptable for canning or potting for sales yard or garden store.
